

Sambrano Roofing & Exteriors LLC

Official Brand Guide

Brand Guide v1.0

Purpose

This Brand Guide establishes the official visual identity, branding standards, and communication style for Sambrano Roofing & Exteriors LLC.

Its purpose is to ensure consistency across all company materials, including the website, proposal package, contracts, estimates, business cards, vehicle graphics, uniforms, social media, advertisements, and future software.

This document serves as the primary reference for employees, designers, marketing professionals, and AI assistants working on behalf of the company.

1. Official Logo

Purpose

The official logo is the primary visual identity of **Sambrano Roofing & Exteriors LLC**. It represents the company's professionalism, craftsmanship, integrity, and commitment to protecting homes and businesses throughout Southern Arizona.

The logo shall be used consistently across all company branding to ensure a recognizable, trustworthy, and professional image across every customer touchpoint.

Primary Logo

Description

This is the official primary logo of Sambrano Roofing & Exteriors LLC. It is the standard logo used for all company branding and marketing materials. Unless an approved variation is required for a specific application, this logo shall always be used to represent the company.

The logo reflects the company's commitment to quality workmanship, honest communication, attention to detail, and long-term customer relationships.

Approved Uses

The official logo may be used on, but is not limited to:

- Company Website
- Proposal Packages
- Estimates
- Contracts
- Invoices
- Business Cards
- Door Hangers
- Flyers
- Vehicle Graphics
- Company Apparel
- Safety Equipment

- Social Media Profiles
 - Google Business Profile
 - Email Signatures
 - Marketing Materials
 - Job Site Signage
-

Logo Standards

To maintain a consistent and professional brand identity, the official logo shall always:

- Be displayed using its original proportions.
 - Remain clear and easy to read.
 - Be printed using high-resolution artwork whenever possible.
 - Have adequate spacing around the logo so it is not crowded by other elements.
 - Be placed on backgrounds that provide sufficient contrast and readability.
-

Improper Use

The following modifications are not permitted:

- Stretching or compressing the logo.
 - Rotating or tilting the logo.
 - Changing the official colors without approval.
 - Replacing fonts within the logo.
 - Adding shadows, outlines, or visual effects that alter its appearance.
 - Using low-resolution or distorted versions.
 - Placing the logo on backgrounds where readability is significantly reduced.
-

Version Control

This logo is designated as the official **Version 1.0** logo for Sambrano Roofing & Exteriors LLC.

Any future redesigns, alternate color variations, or secondary logo marks shall be documented in future revisions of this Brand Guide while preserving this version for historical reference.

2. Brand Colors

Purpose

The Sambrano Roofing & Exteriors LLC color system establishes the official visual color palette for the company and ensures consistency across all branding, marketing, digital, and customer-facing materials.

The color palette shall support the company's desired image of professionalism, reliability, craftsmanship, strength, and trust.

Primary Color Palette

The official brand palette consists of the following core colors:

- Gold — Primary brand accent color used to communicate quality, craftsmanship, and distinction.
- Charcoal / Black — Primary dark color used for backgrounds, headings, navigation, and strong visual contrast.
- White — Primary light color used for contrast, readability, clean layouts, and the approved light/transparent logo treatment.

Color Usage

Gold shall be used as the primary accent color and should not overwhelm the overall design.

Charcoal / black should be used as the primary dark foundation for the brand, particularly in website sections, backgrounds, and supporting visual elements.

White should be used to create contrast, maintain readability, and support the official white logo treatment on dark backgrounds.

The colors should work together to create a clean, professional, premium, and recognizable appearance.

Digital Color Values

Exact HEX, RGB, and CMYK values shall be documented here once the official production color values are finalized and verified.

Until those values are documented, designers and AI assistants shall not invent or substitute color values.

Color Consistency

The official brand colors shall be used consistently across:

- Company Website
- Proposal Packages
- Estimates
- Contracts
- Invoices
- Business Cards
- Door Hangers
- Flyers
- Vehicle Graphics
- Company Apparel
- Social Media
- Google Business Profile
- Email Signatures
- Marketing Materials
- Job Site Signage

Improper Color Use

The following modifications are not permitted without approval:

- Changing the official brand colors.
- Introducing unrelated colors as primary brand colors.
- Using excessive gradients that alter the appearance of the brand.
- Using colors that reduce logo readability or contrast.
- Creating unauthorized versions of the logo using different colors.

Color Version Control

The official color system shall be maintained as part of Brand Guide Version 1.0.

Any future additions, alternate color palettes, or approved seasonal/application-specific colors shall be documented in a future revision of this Brand Guide.

3. Typography

Purpose

Typography establishes the official type system for Sambrano Roofing & Exteriors LLC and ensures that all company communications maintain a consistent, professional, modern, and highly readable appearance.

Primary Typeface

Inter

Inter shall serve as the primary typeface for body text, supporting text, navigation, labels, forms, contact information, and general business communications.

Inter should be used wherever clarity, readability, and clean presentation are the primary objectives.

Heading Typeface

Lexend Deca

Lexend Deca shall serve as the primary heading typeface for major headings, section titles, prominent statements, and other high-visibility brand elements.

Lexend Deca should provide visual distinction from supporting text while maintaining a professional and modern appearance.

Typography Hierarchy

The following hierarchy should generally be maintained:

- H1 — Major page or document titles
- H2 — Major section headings
- H3 — Subsection headings
- Body — General descriptive and informational text
- Small Text — Supporting information, labels, captions, and secondary details
- CTA Text — Buttons and calls to action

Typography Usage

Headings should use Lexend Deca with appropriate weight and spacing to establish a clear visual hierarchy.

Body and supporting text should use Inter for maximum readability.

Typography should remain clean and consistent across all customer-facing materials.

Approved Applications

The approved typography system should be used consistently across:

- Company Website

- Proposal Packages
- Estimates
- Contracts
- Invoices
- Business Cards
- Door Hangers
- Flyers
- Vehicle Graphics
- Company Apparel
- Social Media
- Google Business Profile
- Email Signatures
- Marketing Materials
- Job Site Signage

Improper Typography Use

The following modifications are not permitted without approval:

- Replacing the approved typefaces with unrelated fonts.
- Using excessive decorative or novelty fonts.
- Using inconsistent fonts between sections of the same document or marketing piece.
- Using typography that reduces readability.
- Using excessive font styles, effects, outlines, or distortions.
- Creating an inconsistent visual hierarchy.

Digital Font Standards

The website currently uses Inter for body text and Lexend Deca for headings.

These typefaces shall remain the default digital typography system unless an approved future revision of the Brand Guide establishes a change.

Typography Version Control

The official typography system shall be maintained as part of Brand Guide Version 1.0.

Any future approved typefaces, alternate font systems, or application-specific typography rules shall be documented in a future revision of this Brand Guide.

4. Brand Voice & Communication Style

Purpose

The Sambrano Roofing & Exteriors LLC brand voice establishes how the company communicates with customers, prospects, employees, vendors, and the community.

All communication should reflect the company's commitment to professionalism, craftsmanship, integrity, honest communication, and protecting homes and businesses throughout Southern Arizona.

Core Communication Principles

Sambrano Roofing & Exteriors LLC communication should be:

- Professional — Clear, organized, and appropriate for a professional roofing contractor.
- Honest — Communicate truthfully and never exaggerate services, experience, results, warranties, or project information.
- Clear — Explain roofing information in language that customers can understand without unnecessary technical jargon.
- Confident — Demonstrate knowledge and competence without sounding arrogant or making unsupported claims.
- Helpful — Focus on educating customers and helping them understand their roofing options.
- Respectful — Treat every customer, property, employee, vendor, and community member with professionalism and respect.
- Local — Communicate with an understanding of Tucson and Southern Arizona homes, weather conditions, and roofing needs.

Tone

The overall tone should be professional, confident, trustworthy, approachable, and straightforward.

Communication should feel like a knowledgeable roofing professional speaking directly with a homeowner or property owner.

The company should avoid sounding overly corporate, aggressive, sales-driven, or gimmicky.

Customer-Facing Language

Customer communication should:

- Explain what work is being recommended and why.
- Clearly describe the scope of work.
- Set realistic expectations.
- Communicate pricing and terms clearly.
- Avoid unnecessary technical language.
- Explain technical terms when they are necessary.
- Never pressure customers into making a decision.
- Encourage customers to ask questions when clarification is needed.

Marketing Communication

Marketing materials should emphasize:

- Professional workmanship
- Honest communication
- Roofing expertise
- Protection of homes and businesses
- Desert and Southern Arizona roofing conditions
- Quality service
- Customer trust
- Long-term relationships

Claims & Accuracy

All public-facing communication must be accurate and supportable.

The company shall not make claims regarding licenses, certifications, warranties, insurance, materials, guarantees, or services unless those claims are accurate and currently applicable.

All assistants, designers, employees, and marketing professionals working on behalf of the company shall follow this standard.

Writing Style

Preferred writing characteristics:

- Clear
- Concise
- Professional
- Direct
- Easy to understand
- Customer-focused
- Free from unnecessary hype

Avoid:

- Excessive exclamation points
- Aggressive sales language
- False urgency
- Unsupported superlatives
- Misleading claims
- Excessive technical jargon
- Unprofessional slang
- Overly complicated explanations

Consistency

The approved brand voice shall be used consistently across:

- Company Website
- Proposal Packages
- Estimates
- Contracts
- Invoices
- Business Cards
- Door Hangers
- Flyers
- Vehicle Graphics
- Company Apparel
- Social Media
- Google Business Profile
- Email
- Text Messages
- Customer Phone Communication
- Marketing Materials
- Job Site Communication

Version Control

The official brand voice and communication standards shall be maintained as part of Brand Guide Version 1.0.

Future changes to the company's communication style shall be documented in a future revision of this Brand Guide.

5. Photography & Visual Content

Purpose

Photography is an important part of the Sambrano Roofing & Exteriors LLC brand. Real project photography should communicate workmanship, professionalism, transparency, cleanliness, and attention to detail.

Whenever possible, the company should prioritize authentic photographs from its own projects rather than relying exclusively on generic stock photography.

Primary Photography Style

Company photography should feel:

- Authentic
- Professional
- Clean
- Well-lit
- Detailed
- Trustworthy
- Relevant to roofing and exterior work
- Representative of Southern Arizona properties and conditions

Project Photography

Project photographs should document the actual work performed whenever possible.

Preferred project photography includes:

- Before-condition photographs
- Existing damage
- Preparation work
- Materials and equipment
- Work in progress
- Repairs being performed
- Replaced materials
- Completed workmanship
- Final results
- Cleaned job site
- Before-and-after comparisons

Progress Photography

Progress photographs should be used to communicate project progress and provide customers with visual documentation of the work being performed.

Photos should clearly show important stages of the project when practical.

Roofing Documentation

When photographing roofing work, photographs should emphasize details that help demonstrate the quality and scope of the work, including:

- Damaged roofing materials
- Damaged or deteriorated decking
- Replaced plywood decking
- Roof penetrations
- Flashing
- Valleys
- Drains
- Parapet conditions
- Tile repairs
- Roof coatings
- Surface preparation
- Completed repairs
- Final finished surfaces

Photo Quality Standards

Whenever practical, project photographs should:

- Be clear and in focus.
- Have adequate lighting.
- Show the relevant area clearly.
- Avoid unnecessary clutter.
- Be taken from useful angles.
- Accurately represent the condition of the property.
- Avoid misleading edits or alterations.

Before & After Photography

Before-and-after photographs should be presented honestly and should represent the same project or area whenever practical.

The company shall not digitally alter photographs in a way that misrepresents the original condition, work performed, or final result.

Customer Privacy

Customer photographs shall be handled responsibly.

Photographs that identify a customer, their private property, personal information, vehicles, addresses, or other identifying details should only be used for marketing or public-facing purposes when appropriate authorization has been obtained.

Customer photography and marketing consent should be addressed through the company's applicable customer agreements and privacy practices.

Website Photography

The company website should prioritize authentic project photography, high-quality roofing imagery, and photographs that reinforce the company's local identity.

Photography should support the content rather than distract from it.

Stock photography may be used when appropriate, but it should not falsely represent company projects or work performed by Sambrano Roofing & Exteriors LLC.

Social Media & Marketing

Project photography may be used across approved marketing channels when appropriate and when applicable customer permissions have been obtained.

Photographs should reinforce the company's professional image and should showcase actual workmanship whenever possible.

Version Control

Photography and visual-content standards shall be maintained as part of Brand Guide Version 1.0.

Future photography guidelines, image categories, customer-consent procedures, or visual standards may be documented in future revisions of this Brand Guide.

6. Website Design Standards

Purpose

The Sambrano Roofing & Exteriors LLC website shall serve as a primary digital representation of the company and should communicate professionalism, trust, craftsmanship, and local expertise.

The website design should remain consistent with the company's approved logo, colors, typography, photography standards, and brand voice.

Overall Design Direction

The website should maintain a:

- Professional appearance
- Modern appearance
- Clean visual hierarchy
- Premium but approachable appearance
- Strong sense of trust
- Roofing and construction industry relevance
- Southern Arizona identity
- Clear customer-focused navigation

Visual Style

The website should use the established brand identity as its foundation.

The primary visual direction should incorporate the approved:

- Logo
- Brand colors
- Typography
- Photography style
- Brand voice

The design should avoid unnecessary visual elements that distract from the company's services, projects, credibility, or calls to action.

Layout

Website layouts should prioritize:

- Clear information hierarchy
- Easy navigation
- Readability
- Consistent spacing
- Strong visual balance
- Mobile responsiveness
- Accessible content
- Clear calls to action

Sections should have sufficient visual separation while maintaining a cohesive overall design.

Navigation

Website navigation should be simple, intuitive, and consistent.

Customers should be able to quickly locate important information such as:

- Services
- About the Company
- Projects
- Service Areas
- Contact Information
- Estimates

Calls to Action

Primary calls to action should be clear and easy to identify.

Examples may include:

- Get a Free Estimate
- Request an Inspection
- Call Now
- Contact Us
- View Our Projects

Calls to action should encourage customers to take the next appropriate step without using aggressive or misleading sales tactics.

Responsive Design

The website shall be designed to function properly across:

- Desktop computers
- Laptop computers
- Tablets
- Mobile phones

Important information, navigation, buttons, forms, images, and project galleries should remain usable and readable across different screen sizes.

Accessibility

The website should prioritize accessibility and usability.

Whenever practical, the website should include:

- Appropriate color contrast
- Readable typography
- Descriptive image alternative text
- Keyboard-accessible interactive elements
- Clear navigation
- Proper heading hierarchy
- Respect for reduced-motion preferences

Animation & Motion

Animations may be used to improve the visual experience and communicate hierarchy or interaction.

Animations should:

- Serve a functional or visual purpose.
- Remain smooth and professional.
- Avoid excessive movement.
- Avoid distracting customers from important information.
- Respect users who prefer reduced motion.
- Maintain website performance.

Animation should enhance the brand rather than become the primary focus of the website.

Interactive Elements

Interactive elements such as:

- Buttons
- Navigation menus
- Project galleries
- Image viewers
- Forms
- Cards
- Accordions
- Modals

should provide clear visual feedback and behave consistently throughout the website.

Performance

Website design decisions should consider performance.

Large images, videos, animations, and other visual assets should be optimized whenever practical without unnecessarily reducing quality.

Design should not sacrifice website usability or loading performance for purely decorative effects.

Content Hierarchy

Important customer information should receive visual priority.

The website should clearly communicate:

1. Who Sambrano Roofing & Exteriors LLC is.
2. What services the company provides.
3. Where the company operates.
4. Why customers should trust the company.
5. Examples of completed work.
6. How customers can request an estimate or contact the company.

Design Consistency

Future website updates shall maintain the established design system.

Developers, designers, employees, and AI assistants working on the website shall not introduce major visual changes without approval.

The existing brand system should be extended rather than replaced.

Version Control

The website design standards shall be maintained as part of Brand Guide Version 1.0.

Future major changes to the website's visual design, layout system, interaction style, or animation system shall be documented in a future revision of this Brand Guide.

7. File & Asset Standards

Purpose

File and asset standards establish a consistent system for organizing, naming, storing, and using Sambrano Roofing & Exteriors LLC digital files.

The purpose of these standards is to reduce confusion, prevent duplicate or outdated assets from being used, and ensure that the correct company materials are available whenever needed.

Official Source of Truth

The company's organized Google Drive shall serve as the primary business document repository.

Official business documents, branding materials, templates, contracts, estimates, photographs, and other important company files should be stored in their appropriate Google Drive folders.

Working copies may exist on local computers or other approved platforms when necessary for business operations.

Master Files

Important company assets should have a designated master version.

Master files should not be unnecessarily modified, renamed, or replaced without approval.

Examples of master assets include:

- Official Logo
- Brand Guide
- Proposal Package
- Estimate Templates
- Contract Templates
- Customer Forms
- Company Documents
- Marketing Templates
- Website Assets
- Photography
- Business Operating Documents

File Naming

Files should use clear, descriptive names that make their purpose immediately understandable.

Whenever appropriate, file names should include:

- Company or document name
- Document type
- Version number

- Year or date when relevant

Examples:

Sambrano Roofing & Exteriors LLC Brand Guide v1.0

Sambrano Roofing Proposal Package 2026

Sambrano Roofing Estimate Template v1.0

Sambrano Roofing Customer Contract v1.0

Sambrano Roofing Logo Master v1.0

Version Control

Important documents should use version numbers when revisions are made.

Examples:

v1.0 — Initial approved version

v1.1 — Minor revision

v2.0 — Major revision

Older approved versions should be preserved when they are necessary for historical or business records.

Logo Assets

The official logo should be maintained in high-quality formats whenever possible.

Preferred logo assets may include:

- PNG with transparent background
- SVG
- High-resolution PDF
- Other approved production formats

The official logo should not be recreated from screenshots or low-resolution images when the master artwork is available.

Photography Assets

Project photographs should be organized so that they can be easily associated with the correct customer project.

Whenever practical, project photography should identify:

- Project
- Location or city
- Date
- Before / During / After status
- Relevant roofing system or service

Customer Information

Customer documents and photographs may contain private or identifying information.

Customer information should be stored and handled responsibly and should only be shared with authorized individuals or systems that require access for legitimate business purposes.

Website Assets

Website assets should be stored within the appropriate website project structure and should use clear file names.

Website images, logos, videos, icons, and other assets should not be duplicated unnecessarily.

AI & Third-Party Tools

When company files are provided to AI assistants or third-party software, only the information necessary for the task should be provided.

Business and customer information should be handled according to the company's privacy practices and applicable agreements.

Unauthorized Changes

Employees, contractors, designers, developers, and AI assistants working on behalf of the company should not permanently alter, delete, replace, or rename master business files without appropriate authorization.

Backup & Preservation

Important business records should be maintained in reliable storage systems and should not depend solely on a single local computer.

The company should maintain appropriate backups of critical business documents and assets.

Version Control

File and asset standards shall be maintained as part of Brand Guide Version 1.0.

Future changes to the company's file organization, storage systems, naming conventions, or asset-management procedures shall be documented in future revisions of this Brand Guide.

8. Brand Applications

Purpose

Brand applications define how the approved Sambrano Roofing & Exteriors LLC identity should be applied consistently across company materials, customer documents, marketing, vehicles, apparel, digital platforms, and job sites.

The goal is to ensure that every customer interaction presents a consistent, professional, and recognizable company identity.

Customer Documents

The approved brand identity should be consistently applied to:

- Proposal Packages
- Estimates
- Contracts
- Invoices
- Customer Forms
- Warranty Documents
- Inspection Reports
- Project Documentation

Customer-facing documents should maintain consistent use of the approved logo, colors, typography, spacing, and communication style.

Marketing Materials

The brand identity should be applied consistently to:

- Business Cards
- Door Hangers
- Flyers

- Postcards
- Brochures
- Yard Signs
- Direct Mail
- Digital Advertisements
- Promotional Materials

Marketing materials should communicate the company's services accurately and professionally without misleading or exaggerated claims.

Website & Digital Platforms

The approved brand identity should be maintained across:

- Company Website
- Google Business Profile
- Social Media Profiles
- Email Signatures
- Digital Proposals
- Online Forms
- Future Customer Portals
- Future Business Applications

Digital platforms should use approved versions of the company logo, colors, typography, photography, and communication style.

Vehicles

Company vehicles may display the official company identity.

Vehicle graphics should use the approved logo and brand colors and should maintain clear readability from a reasonable distance.

Vehicle branding may include appropriate company information such as:

- Company Name
- Logo
- Phone Number
- Website
- Roofing Services
- Arizona ROC Information When Applicable

Company Apparel

Company apparel may include:

- Work Shirts
- Hats
- Jackets
- Safety Apparel
- Uniforms
- Other Company-Branded Clothing

Apparel should use approved versions of the company logo and colors.

Job Site Branding

When appropriate, job sites may display company branding through:

- Yard Signs
- Project Signs
- Vehicle Branding
- Safety Materials
- Customer Information Materials

Job site branding should remain professional and should not interfere with safety requirements or property access.

Printed Materials

Printed materials should use high-quality versions of approved company assets whenever possible.

The official logo should maintain its proportions, readability, and approved appearance.

Digital Materials

Digital documents should maintain consistent branding while remaining optimized for screen viewing, mobile devices, and electronic distribution.

Future Brand Applications

As Sambrano Roofing & Exteriors LLC grows, additional branded applications may be developed for new services, equipment, software, customer systems, uniforms, facilities, and marketing channels.

New applications should follow the standards established in this Brand Guide.

Approval Standard

Major new branded applications should be reviewed before becoming official company materials.

The purpose of review is to ensure that new materials remain consistent with the established Sambrano Roofing & Exteriors LLC identity.

Version Control

Brand application standards shall be maintained as part of Brand Guide Version 1.0.

Future changes or additions to approved brand applications shall be documented in future revisions of this Brand Guide.

9. Brand Governance & Approval

Purpose

Brand governance establishes the standards for maintaining, protecting, and approving the Sambrano Roofing & Exteriors LLC brand.

The purpose is to ensure that the company's identity remains consistent as the business grows and as additional employees, contractors, designers, marketing professionals, software, and AI assistants become involved in company operations.

Brand Authority

Sambrano Roofing & Exteriors LLC shall maintain final authority over the company's official brand identity.

The company's approved Brand Guide shall serve as the primary reference for the use of the company logo, colors, typography, photography, communication style, website design, and other branded materials.

Source of Truth

The most recently approved version of the Brand Guide shall serve as the primary source of truth for the company's brand standards.

When different files, designs, templates, or platforms contain conflicting branding information, the approved Brand Guide should be consulted to determine the correct standard.

Approval of Brand Changes

Major changes to the company's visual identity or communication standards should receive approval before becoming official.

Examples include:

- Logo redesigns
- Major color changes
- New typography systems
- Major website redesigns
- New brand marks
- Major changes to company messaging
- New vehicle branding
- Major changes to printed customer materials

Minor design adjustments may be made when necessary for practical application, provided they do not conflict with the approved Brand Guide.

AI & Automated Systems

AI assistants and automated systems working on behalf of Sambrano Roofing & Exteriors LLC should treat the Brand Guide as an authoritative reference for brand-related tasks.

AI systems should not independently redefine the company's identity, create unauthorized logo variations, or establish new permanent brand standards without approval.

When a requested design conflicts with an established brand standard, the conflict should be identified before making a permanent change.

Third-Party Designers & Marketing Professionals

Outside designers, marketing professionals, developers, printers, agencies, and other vendors working with the company should be provided with the appropriate brand standards when they are creating company materials.

Third parties should not permanently modify official brand assets without approval.

Brand Consistency

All company-facing materials should strive to maintain consistency across:

- Digital Platforms
- Customer Documents
- Marketing Materials

- Vehicles
- Apparel
- Job Sites
- Social Media
- Website
- Future Software
- Customer Communication

Brand Protection

Official company assets should be protected from unauthorized modification, misuse, or representation.

Master versions of important brand assets should be preserved so that the company can return to the approved version when necessary.

Future Revisions

The Brand Guide may be updated as Sambrano Roofing & Exteriors LLC grows.

Changes should be intentional and documented rather than made randomly or inconsistently.

Each major revision should receive an updated version number.

Examples:

Version 1.0 — Initial approved Brand Guide

Version 1.1 — Minor approved revisions

Version 2.0 — Major approved brand revision

Historical Versions

When practical, previous approved versions of the Brand Guide should be preserved for historical reference.

Older versions should not be treated as current standards once a newer version has been officially approved.

Version Control

Brand governance standards shall be maintained as part of Brand Guide Version 1.0.

Future changes to brand governance or approval procedures shall be documented in future revisions of this Brand Guide.

10. Brand Reference & Version Control

Purpose

This section establishes the final reference standards for maintaining and using the Sambrano Roofing & Exteriors LLC Brand Guide.

The Brand Guide is intended to provide a single, organized reference for the company's visual identity, communication standards, digital presence, marketing materials, and future brand development.

Official Reference

This Brand Guide shall serve as the primary reference for:

- Company Branding
- Website Design
- Marketing Materials
- Customer Documents
- Digital Platforms
- Photography
- Typography
- Logo Usage
- Brand Communication
- Future Software
- AI-Assisted Business Workflows

Current Version

Document:

Sambrano Roofing & Exteriors LLC Brand Guide

Current Version:

Version 1.0

Status:

Initial Approved Brand Guide

Version Control

All significant revisions to this Brand Guide should receive a new version number.

Version 1.0 — Initial approved Brand Guide

Version 1.1 — Minor approved revisions

Version 2.0 — Major approved revision

Revision History

Future revisions should document:

- Version Number
- Date
- Description of Changes
- Reason for Change
- Approval

Example:

Version 1.1

Date: _____

Changes: _____

Reason: _____

Approved By: _____

Brand Consistency

All employees, contractors, designers, developers, marketing professionals, vendors, and AI assistants working on behalf of Sambrano Roofing & Exteriors LLC should use the most current approved version of this Brand Guide when creating or modifying company materials.

No individual standard within this document should be changed independently without considering its effect on the overall company brand.

Future Development

The Brand Guide is a living business document.

As Sambrano Roofing & Exteriors LLC grows, additional standards may be developed for:

- New Services

- New Marketing Channels
- Customer Experience
- Social Media
- Advertising
- Vehicle Graphics
- Uniforms
- Office & Facility Branding
- Website Development
- Digital Products
- Customer Portals
- Internal Software
- Sambrano OS
- Additional Brand Assets

Future additions should be documented in an appropriate revision rather than being added informally.

Final Standard

The purpose of this Brand Guide is to create consistency, protect the company's identity, and provide a reliable reference as Sambrano Roofing & Exteriors LLC grows.

The company should prioritize consistency over unnecessary change and intentional brand development over temporary trends.

End of Brand Guide Version 1.0
